

Keep up the good work!

Melvin had been suffering for years with diabetes and back pain. He had been on his medication for 13 years.

He and his wife started coming to Revolution Chiropractic together. Within 4 months, his diabetes medication called Metformin had been LOWERED. They then

switched him to another medication, which got halved AGAIN. After the dosages kept lowering, the doctors took him off completely on his medications. Not only has Melvin had

amazing results cutting his medication, but he has higher energy levels than when he started care.

Healing takes time and repetition.

He has greatly enjoyed his experience at the office, and is committed to coming Revolution Chiropractic for his adjustments.
