

AARON

Less Pain

More Life to Live

Aaron is a father to an awesome 2-year-old boy. He works in quality assurance for a semiconductor facility. Aaron is an explorer by nature and enjoys finding cool new parks, road tripping, and relaxing! Aaron first sought out chiropractic care at Revolution Chiropractic when his shoulder pain became unbearable. He was almost ready to give up hope and was afraid he was

going to live in pain for the rest of his life! In addition to the shoulder pain, he had quite a bit of pain in his back from old childhood injuries. After being under consistent care, Aaron has seen amazing improvements in his back and shoulder pain. He's also seen an overall improvement of his energy, well-being, and perspective on life now that he is out of chronic pain! We love hearing stories of life change in body, mind, and spirit because of pain relief from chiropractic care. One of Aaron's favorite things about Revolution is the specific nature of care. He says he "enjoys the pin point approach without all the twisting and cracking!"

“My overall well-being has improved dramatically. I have so much more energy and a more positive outlook on life after getting out of pain.”

-Aaron
