

Avoided Surgery & Reduced Medications

Dan has been married to his lovely wife Denise for 39 years and they have three adult children who are enjoying their own professional careers. Dan has been in the banking profession for 40 years, which translates to a lot of sitting in front of his computer (think of all the microtraumas!). Dan and his wife love to travel and have been to Cabo, Miami, Destin, Key West, and Salt Lake City over the past year. Dan also enjoys golfing, barbecuing, and sports. He says, "I love to BBQ but can't hold a candle to Dr. Jason. The Brinemaster."

Dan first started care four years ago when he felt strain in his lower back. This pain would occasionally leave him laying on the floor, with pain shooting down his legs, numbness in his quads, and stiff neck and shoulders. After being under consistent chiropractic care, Dan can now move freely again. And, he has been able to increase his exercise and reduce his medications by half, including cholesterol and blood pressure medications.

In addition to the improvements Dan has seen over the years, he also saw improvement for an acute injury that happened in 2022. He strained his shoulder and neck from carrying an overly heavy briefcase. This acute injury caused him to experience numbness in his arm and fingers. A physician suggested he needed neck surgery. After explaining the situation to Dr. Jason, Dan fully committed to Dr. Jason's

- plan to repair the issue through chiropractic knowing that surgery could always be a backup option. We are happy to report that Dr. Jason's more consistent chiropractic plan resolved Dan's issue and he was able to avoid surgery...and Dan is happy to report that he is feeling great today.
- "My overall health and well-being improved significantly over the past 5 years thanks to Dr. Jason and the Revolution Chiropractic team. I appreciates the open, welcoming, inviting, informative, and supportive Revolution team and how they always makes for a wonderful experience!" -Dan
