

Less Pain, More Health

Deja is a recording artist and dancer who loves to roller skate, be outdoors, and do anything active or fun.

She has been under care at Revolution for two years. She started care to address her pain, anxiety, and severe allergies. Deja has had allergies and asthma since birth. She also experienced

whiplash and was having quite a bit of pain in her whole body, especially in her neck and hips. Since starting care, Deja has been able to stop taking daily allergy medication. She is in less pain, she's sleeping better, breathing better, and experiencing a life with only mild allergies for the first time ever! She is in less pain than she's been in in years, and she is so thankful for the kindness, care, and relief she has found after starting care at Revolution Chiropractic.

"My body is in way less pain and I'm becoming stronger. I can breathe a lot better and sleep better as well. My allergies are very mild for the first time in my life!"

~ Deja
