

## No More the Sinus Trouble

Donna has managed family investment properties since 1978 in the M-Street neighborhood of Dallas. She loves skiing, camping, and hiking in Montana and Colorado. The outdoors have always been a place of comfort, beauty, and joy for her and her husband, Doyle. After a trip to Santa Fe, Donna and Doyle were mesmerized by the natural beauty of the southwest, so...they came

home and built a beautiful xeriscape garden with bird habitats and water features in 2000. This garden has been published in magazines and has been opened to numerous garden tours.

Donna has been a patient at Revolution Chiropractic for nine years! She initially started care to correct her posture and improve her spine and overall health. One of her main health concerns when starting care was that she found herself always having a sinus infection and sinus headaches. However, since being under consistent chiropractic care, she has seen major improvements. She has been able to stop taking all sinus medicine and she has not had any upper respiratory infections, sinus trouble, or flu since starting care. In addition to the amazing care she has received, she also loves the Revolution Team and the relationships she has built with each of them.

**One of my favorite things about Revolution is the friendships that have be created. It is such a joy to laugh and share with everyone there.**
