

# Numbness Gone & Feeling Regained

Oscar has been a patient at Revolution Chiropractic for five years. He originally came in for 'normal' aches and pains but he was also seeking help for numbness and loss of feeling in both his legs and feet. His doctors told him this was due to too many chemotherapy treatments when he had cancer. He was then told by a nurse and a foot

OSCAR

specialist that there was a ZERO percent chance of regaining feeling in his legs or feet. Oscar didn't like that answer, so when his friend told him about Dr. Jason at Revolution Chiropractic, he thought he'd give it a try. He had been to different chiropractic offices most of his life, but Revolution was the first office that did not twist and crack his spine. Oscar's occasional complaint now (now that he has feeling back in BOTH legs and feet) is that he has occasional pains in them!

Oscar enjoys his weekly Bible Study and spreading the good news of Jesus with others. One thing he really enjoys about coming to Revolution is the friendships he's created with the entire team!
